FERMAX

THE VALUE OF A LEADING BRAND

FERMAX

A WORLD
LEADING BRAND
BACKED BY

70 YEARS OF
EXPERIENCE

The world has changed a lot in the last **seven decades**. Change is the only certainty in today's world but one which Fermax thrives on as it responds to the needs of an increasingly diverse and constantly evolving society that seeks to utilize **technological advances to fulfill aspirations**.

Although we have been **making products since 1949**, we have learned that it is all about building communications. It's about people. It's about you.

Time and passionate dedication have led us to become a world leading company in communication systems for residential buildings, homes and businesses.

OUR PRODUCTION FACILITIES ON THE 70s

TECHNOLOGY
DESIGN
INTEGRATION
PEOPLE

Our job is to create innovative **technology and the best design possible for the people** as to offer buildings with more security, better communication and comfort.

CONNECTIVITY

We take the leap to networkable products including multiple applications. This is a transformation that enable us to continue to serve the needs of a constantly evolving world that seeks ever-close inter-connection.

Therefore we investigate and research into anything from computer technology to new biomaterials.

We invest more than 5% of our sales figures and continue to invest year on year.

FROM VALENCIA TO THE WORLD

INTERNATIONALIZATION

Fermax was born with a clear international vocation. The globalization of markets, despite high demands, has made us reaffirm our commitment. Year after year, we face the challenge of competing successfully with our own culture which has made us unique: **the combination of technology and design.**

Our products, capable of crossing cultural frontiers and responding efficiently to the needs of the most diverse users, are **present in millions of homes around the world.**

GLOBAL PRESENCE

We have 7 subsidiaries in Belgium, China, Spain, France, Poland, United Kingdom, Singapore, **and 4 representative offices** in Colombia, Dubai, Portugal and Turkey.

TECHNICAL-COMMERCIAL NETWORK

Each subsidiary and representative office is able to **serve our customers**, giving guidance to them and allowing our partners to offer more added value in their constructions and projects.

MORE INTERNATIONAL MORE COMPETITIVE

Our international presence has been constantly rising for decades. It has allowed us a **sustained growth** and **constant attention to the competitiveness.**

TECHNOLOGICAL

PARTNERS

OF OUR CLIENTS

We address our projects **alongside our clients** and give them all our support, during and after the completion of any works.

WE PROJECT...

...together with our partners in order to ensure that the designed plan will respond to the needs of the users.

WE SUPPORT...

..installation professionals during the project, solving problems and helping evade the unexpected.

WE ARE...

...by the side of our clients after the works have been done in order attend any doubts, tackle changes or even extend the project.

A **network of International Distributors in more than 70 countries.** This indicates that there are millions of people in the world enjoying our products.

Today, **developers, architects, engineering and integration teams** from around the world choose Fermax for the quality of our products and our committed service.

RESIDENTIAL COMMUNICATION

ALWAYS AT THE LEADING EDGE OF TECHNOLOGICAL INNOVATIONS

We are a leading manufacturer of audio & video door entry systems and access control systems. We offer home automation and security solutions for residences including connectivity features.

AUDIO & VIDEO DOOR ENTRY SYSTEMS

For **entrances** we ensure excellent interior-exterior communication and that doors function properly using our door entry systems.

In the exterior of the building, we offer different panels aesthetics: modular, continuous profile, vandal-proof and even cutting-edge design touch screen devices.

In the **residences**, monitors and telephones are an essential security element in the home. Furthermore, the indoor terminals are an investment in the building's quality. We make the difference between monitors with indispensable features and monitors able to integrate home automation functionalities and call divert to smartphones.

ACCESS CONTROL

In **garages**, we install systems that control vehicle access.

In **entertainment areas** (gym, tennis court, swimming pool) we provide access control systems with restricted hours and/or capacity limits.

Our access controls systems **allow to offer different solutions according to the project's specifications** and types of doors and/or facilities. It is possible to add graphic maps that show the different access points, from which is you can visualize even the integrated cameras in the system and register all the events.

HOME AUTOMATION

Users can incorporate home automation functionalities in the video door entry system and automate its home, allowing them to enjoy the following benefits:

Security, thanks to smoke, gas and water detectors, as well as actuators to limit any damage in the property.

Comfort, by using the control of blinds and lighting as well as temperature regulation.

Energy efficiency, to take complete control over lighting, air conditioning and other supplies in the home, thanks to the monitoring of energy consumption (electricity, water, gas, etc).

CONNECTIVITY

WE TAKE THE LEAP TO NETWORKABLE PRODUCTS

Our products are equipped with numerous user-friendly possibilities for the security and comfort in the home.

They are designed to meet the **demands of a video door entry system from a smartphone or tablet**, wherever you are.

Thanks to the use of Apps it is possible to manage multiple functions from your mobile phone.

WELCOME TO THE FUTURE!

AUDIO & VIDEO DOOR ENTRY SYSTEMS

THE HEART OF OUR COMPANY

Since we created the first Spanish audio door entry system in 1963, Fermax has been the market leader for intercommunication products in buildings. **Our stylish and technological innovations have set the pace in the sector.**

COMBINE DIFFERENT MODULES TO
CREATE **INFINITE POSSIBILITIES**

A **modular** door entry panel that allows the integration of information, communication and access control solutions to customize any project. [IP43 IK7](#)

cityline

A GREAT CLASSIC

CITYLINE is a **monoblock concept** panel. It is manufactured in a highly resistant anodised aluminium profile.

For small installations, because of its capacity to unite simplicity and effectiveness. **Standard or made to measure panels.**

IP43 IK7

MARINE

PERSONALIZE THE MOST RESISTANT STAINLESS STEEL PANEL

The range of **MARINE** panels are **vandal-proof and unalterable**, even in the most extreme conditions. Made in 2,5mm thick stainless steel.

Standard or made to measure panels.

IP54 IK09

BESPOKE RANGE

CHOOSE YOUR SPECIAL PANEL

- Panel with special formats and dimensions.
- Integration of access control modules and special combinations.
- **Logotype laser marking.**
- Residence/Building number and messages **laser integration.**
- Push buttons without card slot and free layout.
- Include backlight.

CHOOSE THE COLOUR

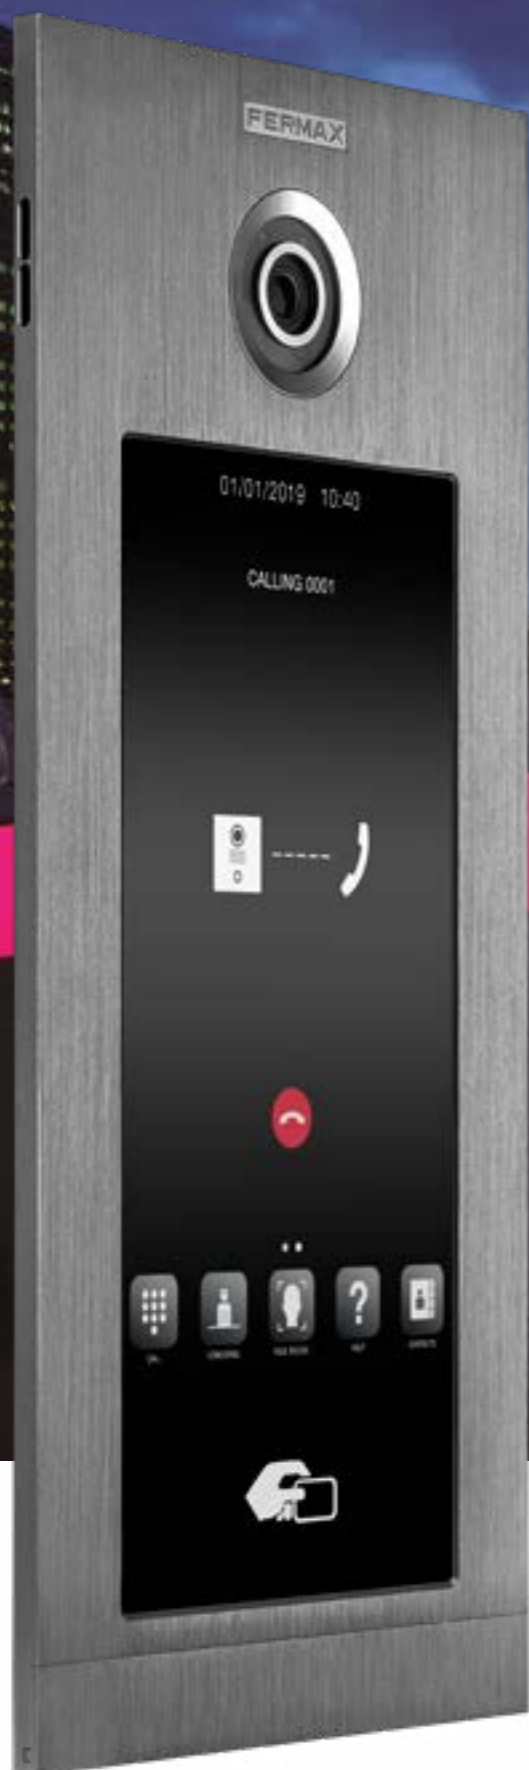

Marine Elite range is available in different colours. Check for availability in other colours.

MILO

CALL. TALK. ENTER OR NOT.
WITH THE **MOST INTUITIVE WAY**

MEET

KIN MEET

ADVANCED TECHNOLOGY

FERMAX

It is the **most interactive** video intercom panel. The perfect combination of graphite finish design and technology, which represents today's **trends on materials and design.** [IP54](#)

Easy use through the digital keypad. A simple video door entry system when it comes to understanding the communication status. [IP54](#)

GUARD UNIT

MEET

From its **9" touch screen**, the guard unit can receive and control the property, as well as receiving alarms.

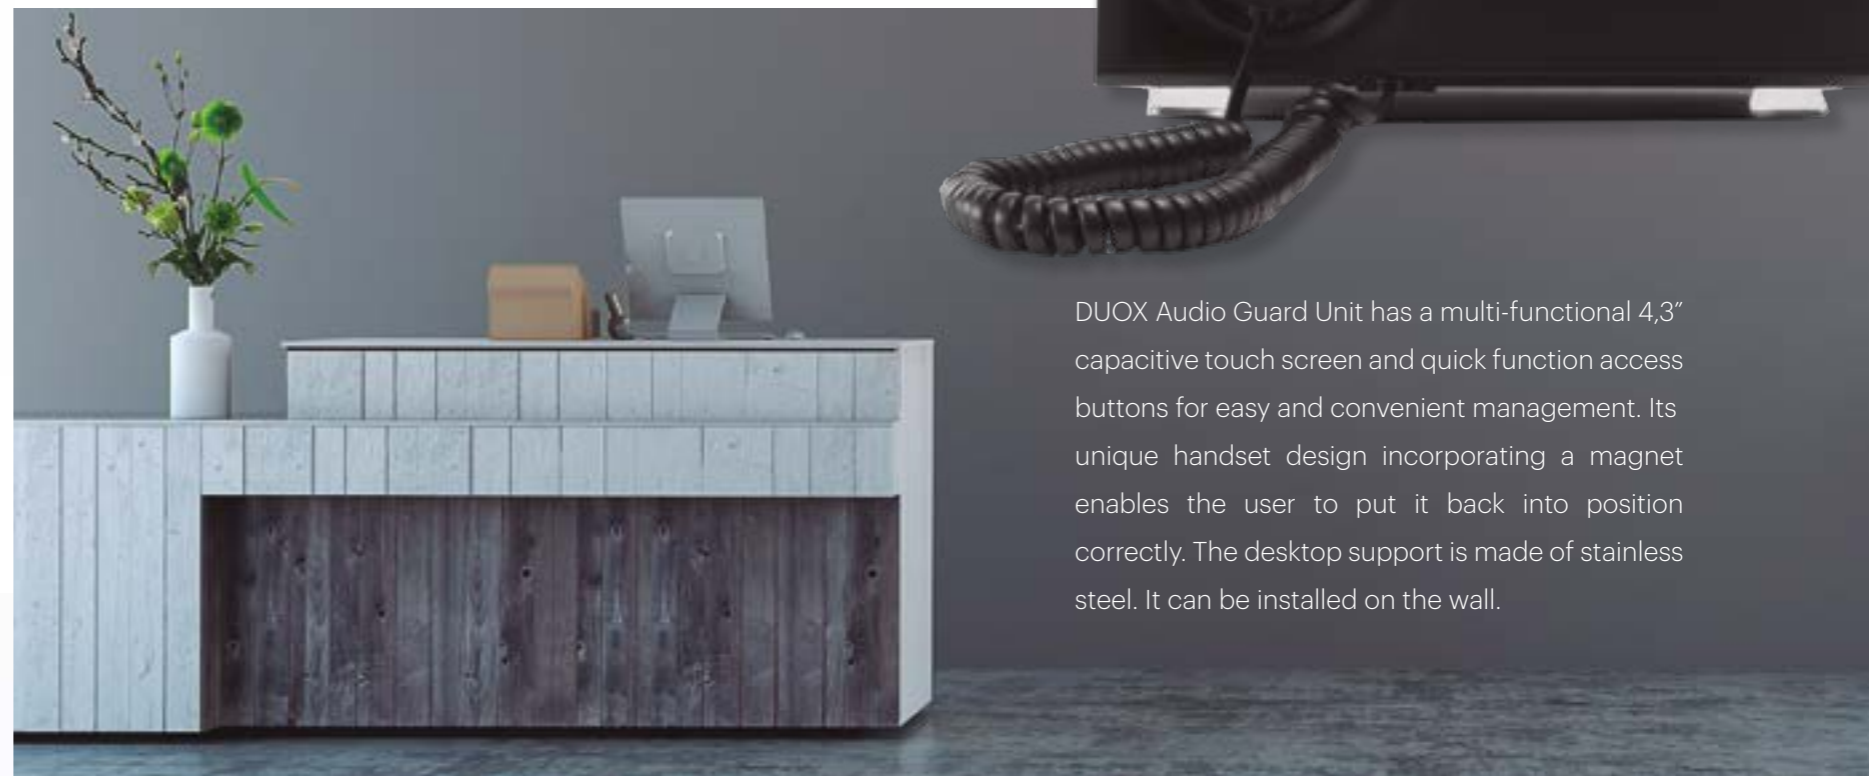

AUDIO **GUARD UNIT**

DUOX

DUOX Audio Guard Unit has a multi-functional 4,3" capacitive touch screen and quick function access buttons for easy and convenient management. Its unique handset design incorporating a magnet enables the user to put it back into position correctly. The desktop support is made of stainless steel. It can be installed on the wall.

DESIGNED TO PROVIDE A **PERFECT OPERATION**

MEET Guard Unit is the desktop device that **allows the property guard to communicate with any outdoor panel or home.**

FERMAX

DOOR ENTRY INTERNAL UNITS

NOTHING BETTER THAN TO SEE
WHO CALLS TO YOUR DOOR

From different aesthetic, our door entry monitors offer multiple and different functionalities. From the most essential, to **establish communication and open the door**, to the possibility of becoming the **technological heart in the home**, integrating all the services.

VEO

THE FERMAX ESSENTIAL

VEO monitor has a balanced design and pure lines. It is modern and minimal. It includes a 4,3" colour TFT screen.

DUOX Photocaller function.
It captures up to 150 images of the visitors.
More comfort and peace in the home!

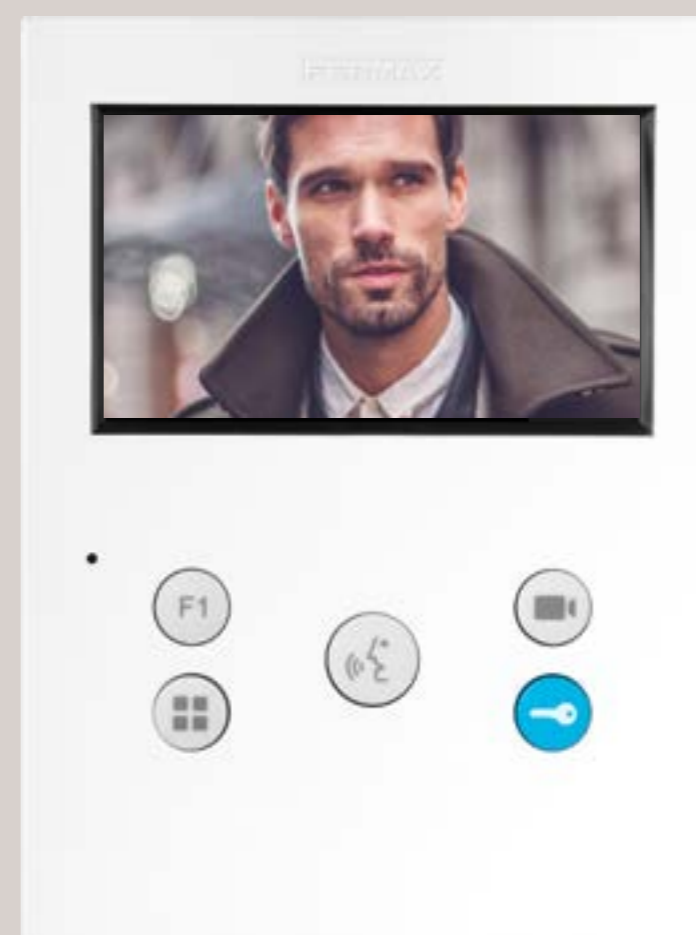

FERMAX

VEO XS

IS THE **SIZE** ESSENTIAL?

For the Interior Design, the size is important. The same applies to **VEO-XS hands-free** monitor. Thanks to its reduced dimensions and essential lines, this monitor gives a sense of clearness, spaciousness and luminosity.

DUOX Photocaller function.
It captures up to 150 images of the visitors.
More comfort and peace in the home!

smile

SMILE DOES AWAY WITH HANDSET, AS WORKS IN A **HANDS-FREE MODE.**

SMILE is a door entry monitor offering **maximum features and user-friendly operation.**

7" colour TFT screen (available with capacitive touch screen) and 3,5".

smile TOUCH
by FERMAX

wit

WE ARE AHEAD TO THE **FUTURE**

The new **WIT monitor** presents a renewed and distinguished aesthetic for the most exclusive environments. It includes a metallic frame that offers a greater robustness to the monitor design.

FERMAX

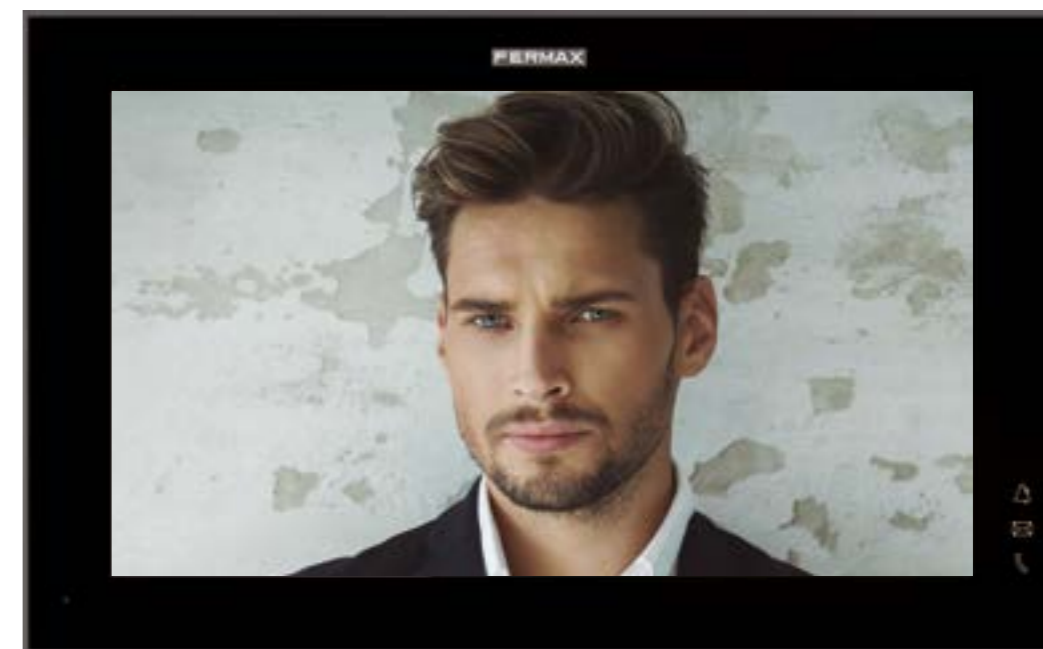

MEET

The exclusive aesthetics of WIT is supported by avant-garde technology that allows the installation of APPS, which increases the added value and functionality of the monitor.

WIT is a PoE door entry monitor allowing a simple installation.

WIT **touch screen interface** lets the user to answer calls, manage missed calls and view the captured images, read the messages received by the property administrator, visualize the video surveillance cameras, activate external relays, notify alarms in the monitor and the guard unit, and even control the home automation in the residence.

The **10" WIT monitor** is specially designed to be integrated with Home Automation solutions. Its installation, both on surface or flush mounted, allows to incorporate the monitor in the most demanding architectural designs.

WIT monitors are available in 7" and 10" screen. Users can also choose among different colours: White, black and gold.

mio

THE MOST FUNCTIONAL MONITOR

The **MIO monitor** is cool, elegant and intuitive. It is the perfect complement for the most technological homes.

An advanced management monitor, with **hands-free** communication, digital audio quality and high definition video.

Its TFT incorporates a capacitive touch screen that offers a **user-friendly** experience by means of graphic icons and notification LEDs (missed calls, messages, "Do not disturb" function).

MEET

MIO MONITORS. DIFFERENT HOMES,
PERSONALIZED COLOURS.

7" and 10" MIO monitors. Available in 3 colours.

FERMAX

LOFT

WE LIKE **SIMPLICITY**

LOFT telephone is a simple use device designed with perfect harmony.

LOFT EXTRA

iLOFT

THE **SIMPLICITY** OF AUDIO

iLOFT telephone allows communication with the outdoor panel in hands-free mode. It ensures high-quality and interference-free communication.

DIGITAL SYSTEMS

LOOKING TO THE FUTURE

FULL DIGITAL 2 NON-POLARIZED WIRES

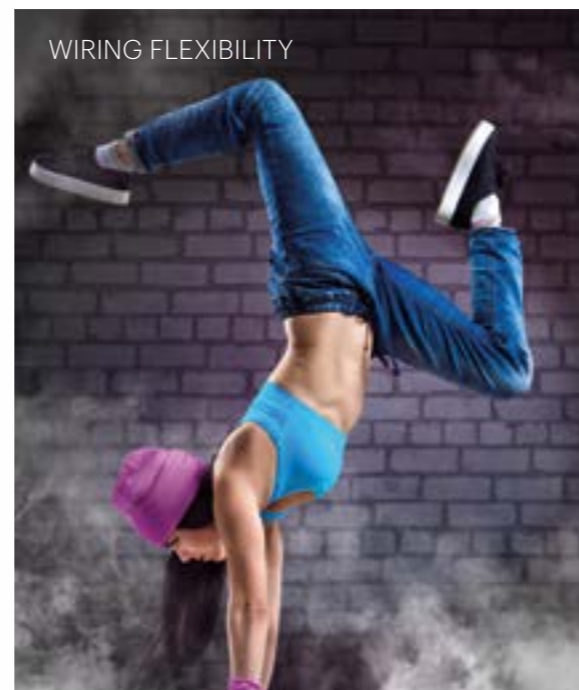

DUOX is the new digital technology that simplifies the installations and exceeds the expectations.

DUOX is the first full digital audio and video door entry Smart System based on 2 non-polarized wires technology.

It offers more performance and capacities, a greater simplification and quickness. And above all, DUOX takes us into a new dimension where all the information (audio, video, data) turns into digital material which is transported by using only 2 non-polarized wires.

DUOX is more than a new residential door entry system.

With DUOX today we are installing the FUTURE.

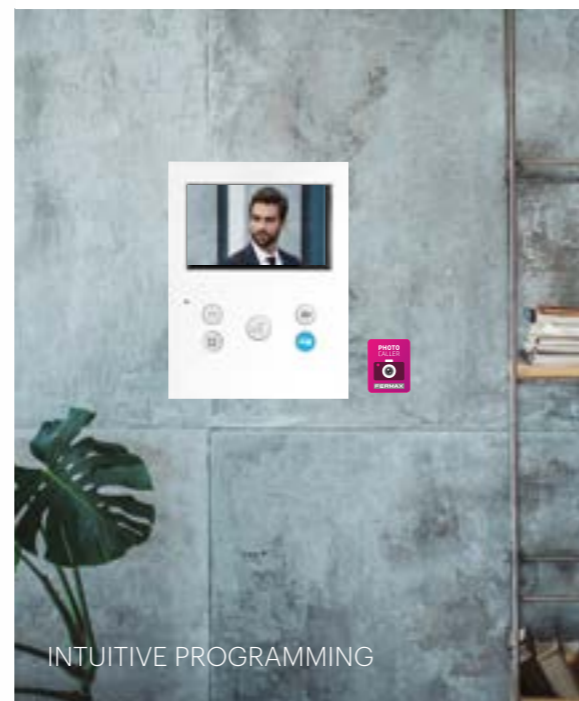

WIRING FLEXIBILITY

SIMPLICITY OF INSTALLATION

SCALABLE SYSTEM

INTUITIVE PROGRAMMING

DIGITAL TRANSMISSION

IMAGE CAPTURE

IP TECHNOLOGY

EFFICIENCY. FLEXIBILITY. POWERFUL

The FERMAX MEET system is a **100% IP technology** based on a Point-to-Point infrastructure, highly efficient, flexible and adaptable.

The devices communicate directly, so MEET **does not require central units or servers** which could compromise the availability of the system in the event of an unforeseen error.

MEET allows the installer to freely assign the range of IP addresses according to the needs of each project, and thus facilitate the control of the networks.

MEET offers **HD video quality and digital audio** which ensures high quality communication.

The system is made up of digital panels, one-button panels, touch monitors, guard units and various accessories.

To guarantee the security of the community, MEET offers a secure system that **allows the integration of access control, CCTV and alarm functions.**

COMMUNICATION

- / High-quality digital audio and video.
- / Simultaneous communication.

You can have as many two-direction simultaneous communications with audio as you have terminals.

Call Divert via the MEET ME app.

The possibility of receiving calls on your mobile phone comes as standard. You just need to have a monitor installed in the property. Download the free application and connect up to eight smartphones from the same apartment.

SECURITY

- / Access control.
- / Face recognition.
- / Lift control.
- / Opening of multiple doors.
- / SOS emergency call.
- / Reception and alarm log.

INTEGRATION

- / CCTV.
- / Home automation management.
- / Activation of automatic mechanisms from the monitor.
- / Third-party access control (Compatible with Wiegand).

HOME AUTOMATION INTEGRATION

COMFORT AND SECURITY

COMFORT

Temperature control, blinds management, lighting regulation. Automation of lights, watering, housing supplies.

SECURITY

Permanent monitoring, taking action in situation of risks. Automated alerts via phone, SMS or push notification.

COMMUNICATION

Control and communication between home automation systems and users through smartphones or tablets.

ENERGY EFFICIENCY

Chronothermostats. Rationalization of energy consumption.

Fermax integrates Door entry and Home automation systems in one single device, the home automation monitor. Its graphical interface

allows to navigate through different rooms and adapt each one according to user's preferences.

Local and remote control of home automation system by using a smartphone or tablet.

ACCESS CONTROL

AUTHORIZED PERSONNEL ONLY

Access control systems can manage the **control of any door, enabling to pass only the people who are previously authorized.**

FERMAX access control can be integrated in outdoor panels or installed independently.

SIMPLE ACCESS CONTROL OR ADVANCED REQUIREMENTS?

For small requirements we have stand-alone access control solution. Centralised systems allow to manage both medium and greater facilities with several access points. They can register and incorporate functions such as no-return security, limit the capacity or restrict certain groups or times.

REMOTE CONTROL

Perfect for garages

IP_Axes is the most advanced system based on **TCP/IP technology**. It is the perfect solution for both great and smaller projects, which require advanced functionalities, remote opening, sitemap, transmission of the notifications by email, etc.

 FINGERPRINT, PERSONAL AND IRREPRODUCIBLE

Most secure. Recognises the user by fingerprint, unique and irreproducible.

Includes a proximity reader for when a finger print is not recognisable.

 INSERT YOUR PIN CODE

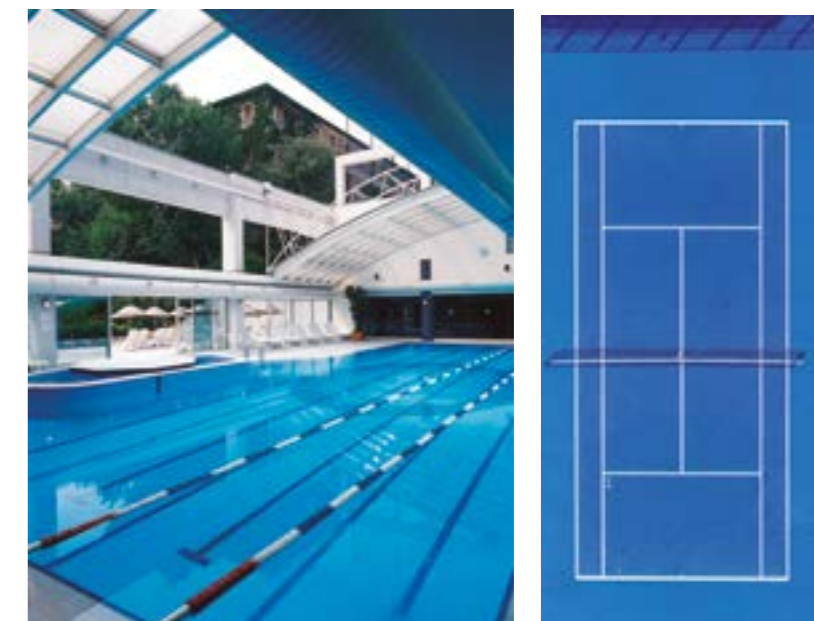

Identification through a PIN code.

The user inputs his PIN code and if it is recognised on the system, access is granted, if not, access is denied.

 BY MEANS OF PROXIMITY CARDS

Comfortable and safe: access is controlled by a card or proximity key.
