	Quantity

The design will be validated by the Production department and subject to the necessary adjustments for its manufacturing.

DUOX push-button panels require call extension modules to connect the push buttons to the amplifier. Do not forget to include these in your order (Ref. 2008 for every 8 push buttons or Ref. 2441 for every 16 push buttons).

To order this plate you can send this PDF directly to your sales representative or your sales support manager.
